This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

- 1. (Previously Presented) A consumer apparatus responsive to a user-input for initiating retrieval of data from a server under control of a predetermined URL or an identifier therefor associated with the apparatus, the data representing content information about the context of usage of the apparatus.
- (Previously Presented) The apparatus of claim 1, the consumer apparatus configured for use and inclusion on a home network and having an Internet-access functionality_through the home network, the predetermined URL or identifier therefor being stored on the home network.
- 3. (Previously Presented) The apparatus of claim 1, comprising a memory for storage of the URL or identifier therefor.
- (Original) The apparatus of claim 1, wherein:
 - the apparatus has a remote control device; and
 - the device has a dedicated button for initiating the retrieval of the data.
- 5. (Cancelled)
- 6. (Currently Amended) A proxy device for representing an apparatus on a home network, wherein the proxy is responsive to a user-input for initiating, via a gateway, retrieval of data from a remote server under control of a predetermined URL or identifier therefor associated with the

apparatus represented, the URL or identifier therefor being stored on the home network, The proxy of claim 5 wherein the data represents content information about the context of usage of the apparatus.

- 7. (Currently Amended) The proxy of claim 5 6, storing the URL or identifier therefor.
- (Previously Presented) The proxy of claim 7, wherein the URL or identifier therefor is programmable.
- 9. (Currently Amended) The proxy of claim 5 6, responsive to a wireless signal.
- 10. (Original) The proxy of claim 9, for transmitting a further signal with a unique identifier upon receiving the signal.
- 11. (Previously Presented) A remote control device for control of a consumer apparatus included on a home network, wherein:
- the device has a key dedicated to initiating, via the apparatus, retrieval of data from a server based on a predetermined URL or identifier therefor associated with the apparatus and stored on the home network; and
 - the data represents content information specific to the context of usage of the apparatus.

- 12. (Original) The device of claim 11, storing an identifier representative of a URL of a file at the server.
- 13. (Previously Presented) A method of enabling a service provider to provide a service via the Internet to a user of a consumer apparatus having a predetermined identifier associated therewith, the identifier being stored on a home network including the apparatus, the method comprising:
- enabling the user to initiate via the apparatus sending of a request with the identifier
 representative of a type of the apparatus to a server on the Internet; and
- based on the identifier, the server initiating user access to a web page with content information about a context of using the apparatus.
- 14. (Original) The method of claim 13, comprising creating a data base of the type per user.
- 15. (Previously Presented) The method of claim 13, comprising creating a data base of URLs or identifiers therefor per user.
- 16. (Previously Presented) The method of claim 13, comprising providing the apparatus with a URL or other identifier for a web page.
